# Changing your cPanel shared web hosting password

Vincent (Vinnie) Curle - 2026-05-07 - [Security](#)

## Overview:

Frequent changes to important passwords help to maintain secure access to your key systems and minimise your risk of compromise.

## Prerequisites:

Validate your IP address via the [Micron21 WebAuth](#). For more information, you can review our [WebAuth article here](#).

## Method:

1. Log into your cPanel shared hosting service.
2. Navigate to the "**Password & Security**" tool under the "**Preferences**" category.
3. Enter your current password in the "**Old Password**" field.
4. Enter your new password in the "**New Password**" and "**New Password (Again)**" fields.
5. Click "**Change your password now!**" to complete the change.
