

Clearing your browser cache

Vincent (Vinnie) Curle - 2023-03-20 - Remote Support

Overview:

Clearing your browser cache can help resolve issues with website loading and display. Here is a guide on how to clear the cache for Chrome, Safari, and Firefox:

Chrome Method:

1. Open Chrome browser.
2. Click on the **three dots** in the top-right corner of the browser.
3. Select "**More tools**".
4. Select "**Clear browsing data**".
5. Choose the time range for which you want to clear the cache.
6. Check the box next to "**Cookies and other site data**".
7. Check the box next to "**Cached images and files**".
8. Click on "**Clear data**".

Safari Method:

1. Open Safari browser.
2. Click on "**Safari**" in the top menu.
3. Select "**Preferences**".
4. Click on the "**Privacy**" tab.
5. Click on the "**Manage Website Data...**" option.
6. Select a website that is listed, then click "**Remove**".
7. To remove all website data from Safari, click "**Remove All**".

Firefox Method:

1. Open Firefox browser.
2. Click on the **three lines** in the top-right corner of the browser.
3. Select "**Settings**".
4. Select "**Privacy & Security**".
5. Scroll down to "**Cookies and Site Data**".
6. Click on "**Clear Data**".
7. Check the box next to "**Cookies and Site Data**".
8. Check the box next to "**Cached Web Content**".
9. Click on "**Clear**".

It's important to note that clearing the browser cache may cause you to lose website preferences and pre-filled login information. These steps may vary slightly based on the browser version you are using.
