Configure Micron21 hosted DNS to point to Micron21 FastDNS servers

Damian JacksonUA - 2024-05-02 - Domain Name

Summary

This article describes how to configure your Micron21 hosted DNS to point to the Micron21 FastDNS servers.

Process

1. Log in to https://domains.micron21.com
2. Select ‘Domains’ on the left
3. Select the domain you’d like to manage
4. Select ‘Manage delegation’
5. Replace any existing name servers with the following:
    1. ns1.fastdns.com.au
    2. ns2.fastdns.com.au
    3. ns3.fastdns.com.au
    4. ns4.fastdns.com.au
6. Select the ‘Update Name Servers’ button
