Configure Micron21 hosted DNS to point to Micron21 FastDNS servers

Damian Jackson - 2024-05-02 - [Domain Name](#)

Summary

This article describes how to configure your Micron21 hosted DNS to point to the Micron21 FastDNS servers.

Process

1. Log in to https://domains.micron21.com

2. Select 'Domains' on the left

3. Select the domain you'd like to manage

4. Select 'Manage delegation'

5. Replace any existing name servers with the following:

   1. ns1.fastdns.com.au

   2. ns2.fastdns.com.au

   3. ns3.fastdns.com.au

   4. ns4.fastdns.com.au

6. Select the 'Update Name Servers' button
