

Configuring an email forwarder in cPanel

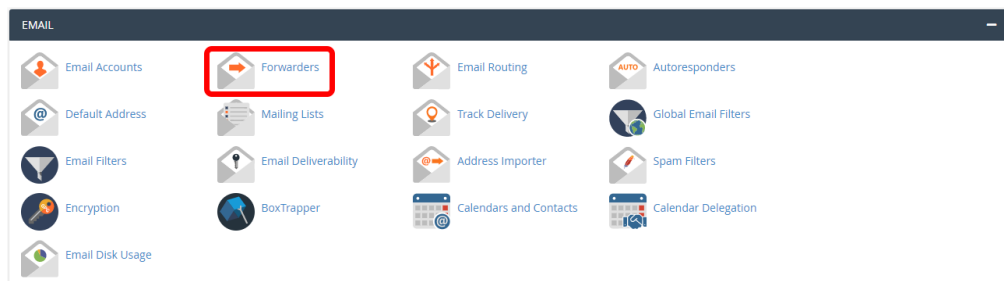

Felix Lane - 2021-09-09 - Comments (0) - Website Hosting

Email forwarders allow you to automatically forward mail sent to your cPanel email address to either other addresses in the same account, or to externally hosted email accounts, such as Gmail or Hotmail.

Method:

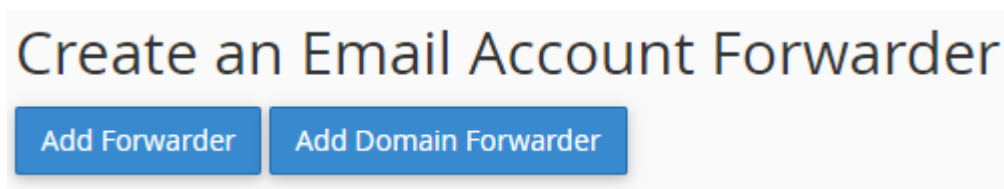

1. Under the "**Email**" header, select "**Forwarders**".

[Click here to show the screenshot](#)

2. Click on the blue "**Add Forwarder**" button.

[Click here to show the screenshot](#)

3. Select the address to forward. *Note that this address does not need to exist as a mailbox on your account.*
4. Select the address to forward mail to.
5. Click on the blue "**Add Forwarder**" button at the bottom of the page.
