Enable Multi Factor Authentication (MFA) on Plesk Services

Vincent (Vinnie) Curle - 2024-09-19 - Website Hosting

This guide describes the steps to take if you'd like to configure Multifactor Authentication (MFA) for your Plesk user account

Steps to follow:

1. Log into Plesk.
2. Navigate to the "**Account**" tab.
3. Click "**My Profile**".
4. Under the **Multi-factor Authentication (MFA)** heading you can navigate to enable and manage MFA options for the account.
5. Scan the QR code into your MFA authentication App of choice and enter the required MFA code.
6. Click "**Save**".
