Enabling auto renew on domains

Vincent (Vinnie) Curle - 2026-05-25 - Domain Panel

Overview:

You can enable auto-renew on domain names within Domain Panel. This will automatically attempt to renew a domain name when it is within 30 days of its expiry date. Auto Renew requires that you have a credit card stored in your Domain Panel account. You can add a credit card to Domain Panel by following the guide here.

Method:

1. Log into Domain Panel (NB: if you're unsure, you can follow our guide).
2. Click on the "**Domains**" tab on the left-hand side panel.
3. Find your domain name on the page, or search for the domain using the search bar.
4. Toggle the "**Auto Renew**" option from "Disabled" to "**Enabled**".
