# Finding your domain password (EPP code)

Vincent (Vinnie) Curle - 2023-02-26 - Domain Name

## Overview:

When transferring a domain name away from Micron21, your new domain provider will require a copy of your domain password.  Some providers may refer to this differently, with some examples being:  Domain EPP Code; Domain Secret; or Domain Passcode.  You can find your domain password in your Micron21 Domain Panel account.

## Method:

1. Log into Domain Panel.
2. Click on the "**Domains**" tab on the left-hand side of the page.
3. Find your domain name on the page, or search for the domain name using the search bar.
4. Click on the "**Domain Name**" and a pop-up window will open.
5. Click "**Show Password**" under the "**Domain Password**" heading, and your unique code for the domain name will be revealed.
