How to convert a Volume to an Image in mCloud

Vincent (Vinnie) Curle - 2025-01-17 - mCloud

This article details the steps required to convert Volume to an Image in the mCloud Dashboard

Method

1. Log into mCloud at https://mcloud.micron21.com/
2. Navigate to Project > Volumes > Volumes
1. 

3. Locate the volume you'd like to convert to an Image.
4. Open the drop-down menu on the right and select "Upload to Image".
5. Give the new image a name, and leave the disk format as "Raw"
1. 

6. Allow time for the upload to complete, then navigate to Compute > Images
7. Locate the Image you just created and from the drop-down menu select “Edit Image”
8. Set a Description and decide on Visibility as required, then click Next
9. On the left, click the down arrow on the "libvirt Driver Options for Images" and click the + on Firmware Type.
10. On the right-hand side, set the firmware type to match what you set when you uploaded the ISO. Then click ‘Update Image’
    1. Note: If this setting is unset, the system will assume BIOS mode
    2.
