How to Review ImunifyAV Scan Results Within cPanel

Tom Matthews - 2024-05-08 - cPanel Shared Web Hosting

To access the malware scanning results of ImunifyAV, please follow the steps outlined below.

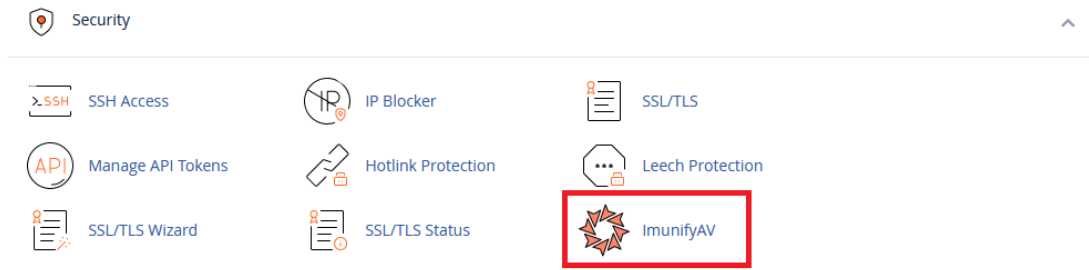

1. Log into your cPanel account

The image shows the cPanel login interface. At the top is the orange cPanel logo. Below it are two input fields: "Username" with a person icon and "Password" with a lock icon. Each field has a placeholder text "Enter your username." and "Enter your account password." respectively. Below the password field is a blue "Log in" button. Underneath the button is a link for "Reset Password". A horizontal line with a circle containing "OR" in the center separates the password login section from the cPanelID login section. The cPanelID section features the cPanel logo and the text "Log in via cPanelID" on an orange background.

1. After logging in, proceed to the Security section located within your cPanel dashboard.

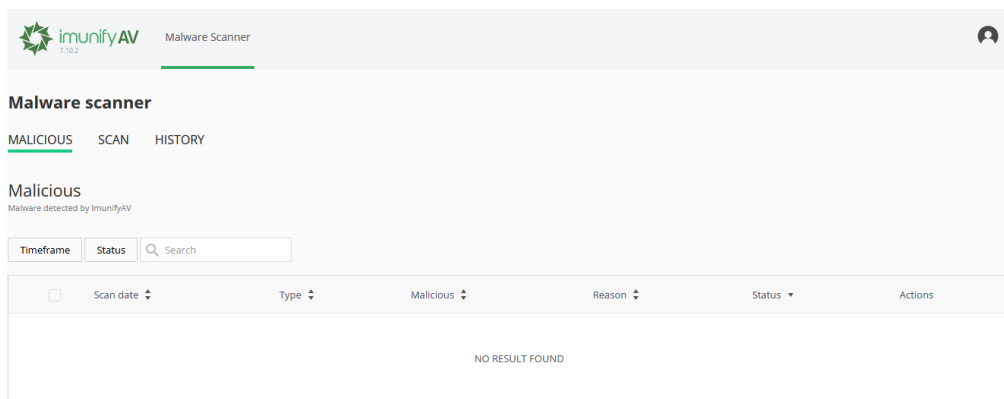

1. In this section, select **ImunifyAV**.

1. After accessing the ImunifyAV plugin, review the files listed under the tab labeled **"MALICIOUS."**

1. If you don't see any files listed, it indicates that your website is free of malicious files.

1. If you observe files listed with a numerical value indicated in the Malicious section, it signifies that these files have been identified as containing malware
