

How to Review ImunifyAV Scan Results Within cPanel

Tom Matthews - 2024-05-08 - cPanel Shared Web Hosting

To access the malware scanning results of ImunifyAV, please follow the steps outlined below.

1. Log into your cPanel account
1. After logging in, proceed to the Security section located within your cPanel dashboard.
1. In this section, select **ImunifyAV**.
1. After accessing the ImunifyAV plugin, review the files listed under the tab labeled **"MALICIOUS."**
 1. If you don't see any files listed, it indicates that your website is free of malicious files.
 1. If you observe files listed with a numerical value indicated in the Malicious section, it signifies that these files have been identified as containing malware
